This work is targeted at protecting the lake which serves as the drinking water source in the area.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

The City continues to actively inspect outfalls and is utilizing two interns this summer to further refine the mapping of the sewersheds in the City. The City also continues to fund the onsite wastewater treatment system inspection program throughout the watershed. A draft model onsite wastewater treatment system law has been developed and adopted by some communities in the watershed. Monitoring continues in the lake and stormwater visual monitoring continues along Sucker Brook

C. How many times was this observation measured or evaluated in this reporting period?

1. Choose/list each municipal operation/facility that contributes or may potentially contribute Pollutants of Concern to the MS4 system. For each operation/facility indicate whether the operation/facility has been addressed in the MS4's/Coalition's Stormwater Management Program(SWMP) Plan and whether a self-assessment has been performed during the reporting period. A self-assessment is performed to: 1) determine the sources of pollutants potentially generated by the permittee's operations and facilities; 2) evaluate the effectiveness of existing programs and 3) identify the municipal operations and facilities that will be addressed by the pollution prevention and good housekeeping program, if it's not done already.

The City will also continue to budget for and implement where possible stream and wetland restoration projects.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

The City has continued the ban on pesticides in the parks and limits, or eliminates, the use of nitrogen fertilizer. No phosphorus is applied to City parks. The City's sensible salting strategy continues to be followed during snow fighting events. The City's street sweeper is kept deployed to the greatest extent possible.
